---

As you know we are working with HydroQual to complete the pathogen, nutrient and toxic TMDLs before the contract expires in May 2013.

This has been a joint effort and in keeping with that approach, I ask that you review the attached fact sheet and weigh in on the five outstanding nutrient issues. All are things we have discussed in the past but since we are now at a decision point and many things have changed, I thought it would be worth a week to see if we can get concencess on how to move forward.

Please send me your comments on these issues by COB Tuesday Nov 20, 2012.

On Wed Nov.21 we will provide HydroQual with guidance on these issues.

Thanks

Felix
